

Environmental Policy

At Diversified Engineering & Plastics, LLC, we strive to be not only a top-quality plastic injection facility but also a responsible corporate citizen. We recognize that we have environmental opportunities and stand committed to aligning our customer's plastic injection needs with our social responsibility. In today's global market-place, sustainability is important and for this reason, Diversified Engineering & Plastics, LLC continually evolves in order to meet environmental demands centered around:

- We will be good stewards of the environment by recycling, resource conservation, and pollution prevention.*
- We will comply with environmental regulatory, legal and other requirements which the organization subscribes that relate to our environmental aspects.*
- We will set the framework for driving environmental performance.*
- We will document, implement and maintain our environmental management system.*
- We will communicate to all employees that environmental stewardship is the responsibility of every employee.*
- We will continually improve our operations and seek out opportunities to reduce its environmental footprint.*
- We will communicate our environmental policy by posting it on our web site and in our lobby.*
